Producent	DJI

Opis produktu

Overview

As an upgraded version of the Payload SDK Development Kit, the Payload SDK Development Kit 2.0 can be used with SKYPORT V2. Different from the development board of its previous version, this kit contains an Adapter Board that allows developers to connect their own development boards to it. Besides connectors for Round Ribbon Cables, additional connectors for Flat Ribbon Cables are also available, further lowering development costs.

Highlights

Additional integrated connectors for Round Ribbon Cables. New Adapter Boards can be compatible with any third-party develop board.

Tips

Review the User Manual before use.
