Opis produktu

Summary

The O3 Air Unit ND filter, ingenuity designed by GEPRC team, has two mounting methods to solve filter mounting problems. Also adapted to DJI AVATA, a variety of filter effects, suitable for a variety of daylight effects to improve image quality.

Feature

1. Aluminum alloy sturdy frame, no fear of dust and scratches.
2. Two types of installation, to solve the frame lens filter installation trouble.
3. Multi-protection: scratch-proof, dust-proof, oil-proof, effective protection of the lens.
4. Lightweight and portable, ultra-thin, ultra-clear lens.
5. Multiple high-quality coating, restore the image quality of the original color.
6. Six options are available, easily cope with a variety of daylight environment shooting.
