Opis produktu

PRODUCT DESCRIPTION

Finally our new iFlight 3D printed high quality TPU naked GoPro8 case is here! Durable, flexible and easy to install. GoPro SuperView designed to ensure there's nothing blocking your lens. ND filter mount (Compatible with standard GoPro Hero5-8 ND filter attachments)

You guys know our reliable 5V BECs to power your naked GoPros already, so we designed a new GoPro Power PCB around specially designed for GoPro8 boards at only 2.3g. Stop damaging your 5V GoPro input circuits and get one of these, due to high quality hardware and filtering your GoPro will record each and every file, without getting stuck half way through.

Mode Button, Rec button and a signal wire that can be attached to your FlightControl for Radio activated recording. Short out the Mode pad with GND and it will also power up instantly when feeding power. It can't be easier!

INPUT 2-6S (7.4-26V) ONLY! PLEASE DON'T FEED 5V AND EXPECT IT TO WORK!
