### Opis produktu

GEP-CL25 Frame is designed by GEPRC team. It can be used for Vista HD digital image transmission system or Analog image transmission system. The center of gravity of the quadcopter is in the middle, Redesigned the shock absorption structure of the camera mount and GoPro Lite, Eliminated the jelly of the camera and FPV camera, and we can use 3, 4 and 5 damping rings according to the flight state to obtain the best stability in vibration and noise.

### Configuration

- Brand: GEPRC
- Item: GEP-CL25 Frame
- Motor to Motor: 109mm
- Internal diameter of Guard: 2.5inch
- Camera size: 19~20mm
- Propeller: 2.5inch
- The hole size of Motor: 9mm ( Compatible with 1105/1204/1206 Motor)
- The hole size of FC: 26.5\*26.5mm
- Thickness of Top Plate: 2.5mm
- Thickness of Bottom Plate: 1.5mm
- Thickness of Bottom Plate(camera): 2mm
- Weight: 47.8 Grams

### Include:

- 1 x Top plate 2.5mm
- 1 x Bottom plate 1.5mm
- 1 x Bottom Plate(Camera) 1.5mm
- 4 x M2\*3.5\*25mm Aluminum posts
- 2 x M2\*3.5\*8mm Aluminum posts
- 28 x M2\*6mm YFS Round head screws
- 2 x M2\*8mm YFS Round head screws
- 4 x M2\*12mm YFS countersunk head screws
- 16 x M2\*2mm Nylon Nuts
- 4 x M2\*18mm YFS countersunk head screws
- 5 x Damping Rings
- 1 x 19\*19mm Mount of camera
- 1 x 14\*14mm Mount of camera
- 1 x 3D print part of XM antenna
- 1 x 3D print part of TBS antenna
- 1 x Naked Camera Base
- 2 x Batteries pads
- 2 x EVA Landing pads
- 4 x 2.5inch Guards
- 1 x EVA Damping Ring of Guard
- 2 x Antenna Tubes
- 2 x Batteries straps (M15\*150mm)
