Producent	Team Black Sheep

Opis produktu

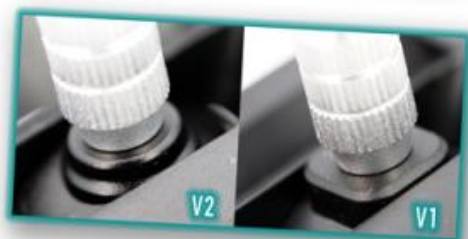

Replacement V2 Gimbal for your Mambo or Tango 2 remote control.

The new gimbal has been a development long in the making. Collecting all customer feedback over the last 3 years, we managed to manufacture to tighter tolerances with stronger materials to produce a more accurate, better feeling and more robust gimbal while keeping the cost minimal.

If you are considering an upgrade from your existing Mambo or Tango 2, here is a list of all improvements / benefits:

- Better reliability against temperature deformation
- Polished, harder material for very smooth throttle feel
- Metal lever for more accurate centering and extremes
- Bigger control over throttle and pitch range
- Minor design improvements to reduce manufacturing tolerances
- Easier calibration despite the use of advanced 3D hall effect sensors

Combine with our gimbal lubricant for the ultimate in gimbal experience.

TBS TANGO II
crossfire remote

TBS MAMBO
tracer remote
